

SHIVANSH SEHGAL

COMPUTER ENGINEERING STUDENT

Computer Engineering student with strong foundations in Python, C++, SQL, and web development. Experienced in building AI-powered applications, full-stack web projects, and software solutions. Passionate about problem-solving, continuous learning, and developing scalable applications using modern technologies.

EDUCATION

Bachelor of Technology (B.Tech), Computer Engineering *Expected May 2026*

Thapar University — Patiala, India

High School Diploma *May 2023*

Thapar University — Patiala, India

EXPERIENCE

AI/ML Intern *January 2026 – June 2026*

A2IT — Mohali, India

- Developed an AI-powered attendance system using Python and OpenCV, capable of real-time face detection and automated attendance logging.
- Worked with image datasets, data preprocessing, and model training to improve recognition accuracy.
- Collaborated on AI/ML concepts including NumPy, Pandas, data visualization, and model development.

Software Engineer (Training) *June 2022 – August 2022*

Infosys Technologies — Patiala, India

- Coordinated with other engineering students to evaluate and improve software interfaces.
- Analyzed proposed technical solutions based on customer requirements.
- Developed a stock marketing site using Python.

PROJECTS

Smart Glasses for the Visually Impaired (Capstone Project)

- Integrating a camera with an object detection model to identify obstacles in the user's path.
- Incorporating text-to-speech (TTS) functionality to read text from signs and documents aloud.
- Developing a navigation system using GPS and haptic feedback for directional guidance.

Airbnb / Hotel Booking Website

- Built a full-stack web application with a user-friendly interface for searching and booking rooms.
- Designed and implemented a backend system to manage listings, user profiles, and bookings.
- Integrated a secure payment gateway for online payments and developed a review system.

Face Recognition Attendance System *Python, OpenCV, Machine Learning*

- Engineered an AI-driven solution for monitoring attendance through live facial identification and digital record-keeping.

Stock Marketing Website *Python, Flask, SQL*

- Constructed a dynamic online platform providing market insights coupled with a secure member login architecture.

TECHNICAL SKILLS

Programming

— C, C++, Python

Web Development

— HTML, CSS

Databases

— SQL, MongoDB

AI / ML

— OpenCV, NumPy, Pandas, Seaborn, Machine Learning

Other

— Problem-solving, Debugging
